

KDC8800 Multi-Functional Bluetooth Rear View Mirror

KDC8800 is a driving safety and entertainment product integration of Bluetooth Hands free car kit, car reversing radar and MP3 player, and equipped with LCD screen. It is the Bluetooth car kit or MP3 player normally, only during the car reversing status, it will automatically switch to be a reversing radar with the reminding tone and distance showing between the car rear part and the obstacles. The MP3 player can play the music from the SD car and transfer the music to the car radio by FM emitter .
